## ELECTION/RESTRICTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species:

**Species A:** wherein the at least one face layer comprises paper

**Species B:** wherein the at least one face layer is moisture-resistant.

The species are independent or distinct because the methods are mutually exclusive. Paper cannot be moisture resistant unless said paper is coated with moisture resistant material.

Applicant's specification does not support a method wherein the face layer comprises paper and is coated with a moisture resistant material. Furthermore, upon reading page 20, lines 21-23 of applicant's specification, it is clear that the species are mutually exclusive methods. It is noted that applicant does not have support in the specification to claim a method wherein the face layer is a moisture resistant paper.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 61, 62, 65-69, 72-74 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an

Art Unit: 1733

allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
